

# CAMPARI

*Campari Compositi Per Campioni S.a.s.*

*Campanari Compositi per Campioni* is an enterprise that is remarkable in embracing high quality Italian craftsmanship and excellence thanks to the sophistication and quality of its products.

Since 1994 Enrico Campanari, who once worked for the Ferrari F1 racing division and now produces protections for several sporting activities using aviation technology and materials such as carbon fiber, kevlar, zylon, etc...

The key factor in all production is that it is light, high-performing and environmentally friendly, and it is around this that the company has built an international reputation.

True to these values, *Scuderie Campari* designs and manufactures the most beautiful and prestigious pedal cars for children. In 2012 **MIRA**, a jewel of design and technology designed for children aged 3 to 6 years old, was brought into being.

**MIRA** is inspired by the legendary Ferrari 357 F1 car and sports a Nardi steering wheel and a Schedoni leather seat.

***Amaida***, which is a pedal car in wood and aluminium,  
comes from the passion and  
enthusiasm for making dreams come true.  
***Amaida*** is for children up to 8 years of age and  
can be assembled at home.

Recent cooperation with Pininfarina,  
the most prestigious automotive  
design company  
in the world,  
has created another  
beautiful pedal car *Fuoriserie*  
that will be  
produced in a limited series  
of 30 units.

**SC01 Biposto** is the name of the latest milestone achieved by *Scuderie Campari*: this is an innovative two-seater, hybrid pedal car, designed by award-winning designer Christian Grande. The **SC01Biposto** comes in a number of touring and sports versions, and can be customised in all its components.

*Campari* is today truly proud of its new projects it has for the Paralympic sports. This mission has already accomplished the creation of a carbon fiber platform for Paralympic fencing.
